

Raphael Mansueto

Senior Full-Stack Engineer | AI Integrations

Cebu City, Philippines | raphaelmansueto@gmail.com | raphaelmansueto.com | [LinkedIn](#) | [GitHub](#)

Senior full-stack engineer with 5+ years building reliable systems across AI integrations, web, and mobile. Recent work includes institutional EVM/Solana settlement, asynchronous AI hiring systems, customizable campaign workflows, and live marketplace products.

EXPERIENCE

WISEO

Senior Full Stack Developer

Cebu, Philippines

June 2025 - Present

- Architect operator-facing workflows for an institutional digital-asset settlement platform spanning administration, compliance, client, transaction, and ledger operations.
- Extend an EVM-first Next.js portal toward Solana parity using Viem, Wagmi, @solana/web3.js, and wallet adapters behind a consistent network strategy.
- Develop Node.js and NestJS gateway services across settlement execution, signing, authentication, banking, and blockchain integration boundaries.

HustleWing

Full-Stack AI Integration Engineer

Illinois, US - Remote

February 2023 - December 2025

- Led frontend and product delivery for a Next.js hiring and entrepreneurship platform, translating requirements into shipped customer and administrative workflows with cross-functional partners.
- Built Go and OpenAI services that turned uploaded resumes into validated profiles and personalized application pitches.
- Moved long-running resume processing into Google Cloud Pub/Sub with persisted PostgreSQL run records, traceable state, and explicit failure handling.
- Connected grounded research, voice interviews, video processing, human approval, and social publishing in a production AI media workflow with observability across asynchronous stages.
- Turned business data into customizable campaign drafts with a feedback loop and human decision gate before final use.

Outliant

Full-Stack Developer

Texas, US - Remote

June 2022 - November 2022

- Built Next.js customer experiences and Express APIs for a social platform, plus internal tools used by operations teams.
- Delivered server-rendered forms and administrative dashboards that helped users submit complex data and operations teams manage it.
- Cleared delayed sprint work and technical debt, helping the team reduce its backlog and restore delivery momentum.

Vibravid

Junior Software Engineer

Michigan, US - Remote

June 2021 - March 2022

- Developed, tested, and deployed Solidity contracts on Ethereum for token transactions and platform features.
- Expanded multi-chain and community operations through Node.js integrations with Tron, WAX, Syscoin, and Telegram automation.

SKILLS

Languages: TypeScript, JavaScript, Go, Solidity, SQL **Product:** React, Next.js, Expo, React Native, TanStack Query (React Query), Node.js, NestJS, Gin **AI:** OpenAI, Gemini, Mastra, LangGraph, Vercel AI SDK, structured outputs, embeddings, Langfuse **Data and platform:** PostgreSQL, Supabase, Drizzle, pgvector, tRPC, Zod, Pub/Sub, Docker, AWS, EVM, Solana **Reliability:** XState, Vitest, Playwright, idempotency, transactions, outbox workflows

EDUCATION AND RECOGNITION

BS Computer Science, Cum Laude - Cebu Institute of Technology - University | Rank 7, 7th TOPCIT Philippines 2022 | 2nd Place, CIB.O Interschool Hackathon 2023
